

Newton Toney Groundwater Level 2023-24

Groundwater Report 8-May-2024

The groundwater is now falling steadily and is now 1ft 8in (52cm) below. The Bourne level has also fallen over the week and I would expect it to stop flowing around the end of the month . I measured the wading depth at the ford and at just under 9 inches it is an acceptable depth. I received permission from the Police to remove the cones and road closed signs etc and the ford is now open. All 3 nearby groundwater stations are falling and at or below the normal range. This is my last report until October.

Next report due: w/b 7-Oct-2024
