

Newton Toney Groundwater Level 2024-25

Groundwater Report 25-Oct-2024

The groundwater level continues to rise and is now 9'6" (2.90m) below having risen 80cm (2' 8") over the past 10 days. October has been somewhat less wet than September - currently we have had about 90% of the LTA rainfall. I will start 2-weekly measurement reports. I would advise checking your pumps if you have them.
Next report due: w/b 11-Nov-2024
